

The Week on Wall Street

Stock prices bounced around last week as investors reacted to wild swings in the price of oil and reports that called into question the efficacy of two potential virus treatments.

The Dow Jones Industrial Average retreated 1.93%, while the Standard & Poor's 500 lost 1.32%. The Nasdaq Composite Index slipped 0.18%. The MSCI EAFE Index, which tracks developed overseas stock markets, declined 1.21%.^{1,2,3}

Oil Wavers, Promising Virus Treatments Disappoint

Stocks opened the new week lower on the heels of a plunge in oil prices that saw the May oil futures contract fall into negative territory. While negative prices were largely reflective of technical issues associated with trading the contracts rather than the actual price of oil, the unprecedented move unsettled investors.

Stocks found some positive momentum as the week wore on, buoyed by corporate earnings reports that showed solid performance amid a challenging environment.

On two separate days, however, solid moves to the upside were derailed by disappointing news on promising COVID-19 treatments. One drug failed to produce positive results in its first trial, followed the next day by an FDA warning against taking chloroquine and hydroxychloroquine to treat COVID-19. Stocks managed to rally and trim the week's losses during the market's final hours on Friday.

The Economic Reopening Begins

States across the nation, including Georgia, Tennessee, South Carolina, and Texas, have begun the process of slowly reopening commerce, while Montana's governor announced the first phase of restarting its economy.^{4,5}

Each state is taking a different approach, potentially serving as a laboratory to help guide other states in their efforts to reopen businesses. From the market's perspective, these early steps are not only hopeful signs that the journey to normalization may have begun, but they may provide important clues to how quickly business activity can rebound and the degree to which individuals resume social engagement – two important metrics that may influence the market in the weeks ahead.

THIS WEEK: KEY ECONOMIC DATA

Wednesday: Gross Domestic Product (GDP). Federal Open Market Committee (FOMC) Meeting Announcement.

Thursday: Jobless Claims.

Friday: Purchasing Managers Index (PMI): Manufacturing Index. Institute for Supply Management (ISM) Manufacturing Index.

Classic Tomato and Bread Soup

Serves 6

Ingredients:

- 1 medium onion
- 4 Tbsp. olive oil (divided)
- 4 to 6 cloves garlic, minced
- 2 28-oz. cans whole, peeled tomatoes
- 2 to 3 bay leaves
- 2 cups of chicken stock
- 1½ cups of cubed, rustic bread (best to use day old)
- 1 tsp. dried oregano
- Pinch of chili flakes
- Approximately ½ tsp. salt, to taste
- Fresh ground pepper, to taste
- Freshly grated Parmesan cheese
- Chopped fresh basil or parsley, for garnish

Directions:

1. Begin by adding the olive oil to a 5- to 6-qt. Dutch oven, warmed on medium heat. Sauté onions until translucent. Then, season with salt and pepper, add minced garlic, and cook for a few additional minutes.
2. Next, crush the tomatoes by hand and transfer into the pot.
3. Add the chicken stock, bay leaves, and dried oregano. Heat to a simmer, then reduce heat to maintain a low simmer. Cook for about 20 minutes.
4. Warm up a large frying pan on medium heat and add the remaining olive oil to a sauté pan. When the oil is hot, evenly spread the cubed bread in the pan. Toss to coat with oil and brown the sides of the bread evenly.
5. After the soup has cooked for approximately 20 minutes, add the browned bread cubes. Cook for about 5 more minutes, then turn off the heat, cover the soup,

and let stand for 15 minutes. Remove the lid, then extract the bay leaves and discard.

6. Set aside about $\frac{1}{3}$ of the soup. Purée the rest with an immersion blender or pour it into a food processor and blend until smooth. Incorporate the blended and unblended soup. Pour into bowls and serve with grated Parmesan and chopped fresh parsley or basil.

Selling Your Home?

If you're putting your home on the market, you may be able to manage taxes on some of your capital gains. Read on to see what the IRS regulations say.

If you show a capital gain on the sale of your home, you may be able to exclude all or a portion of the gain from your taxes if you have owned and used it as your primary residence for at least two out of the past five years.

Assuming you meet the criterion stated above, you may exclude up to \$250,000 from your taxes if you're a single filer (or up to \$500,000 if you're filing jointly). This exclusion may be used no more than once every two years. (Please note that the Net Investment Income Tax will not apply to the excluded gain.)

Keep in mind that this tip is for informational purposes only. Be sure to consult your tax or accounting professional for more information about the possible tax treatments when selling a home.

Please be aware that if you claimed the first-time homebuyer credit when purchasing your home, special rules may apply to the sale. If you'd like to read more about tax rules when selling a home, you can check out Form 523 on [IRS.gov](https://www.irs.gov).

* This information is not intended to be a substitute for specific individualized tax advice. We suggest that you discuss your specific tax issues with a qualified tax professional.

Hitting a Lob Shot

Do you have to get out of some thick rough close to the hole, without much green to work with? Do you need to get your ball over a bunker, then land it softly? These situations call for lob shots, which are not that hard to hit.

A lob shot is akin to a cut shot. To hit a good lob, take a wide stance, open the clubface, and play the ball off your left instep with your weight shifted a bit onto your right foot. Your grip should be loose and relaxed. Your wrists should cock sharply as soon as you take the club back. Your hands should be quiet on the downswing. Lob shots ultimately have a lot to do with feel, so practice these shots to acquaint your mind and muscles with what needs to happen.

Our Furry Friends Can Improve Our Health

Did you know having one or more companion animal in your life may be beneficial to your health? This tip is not a substitute for medical advice, especially for those who may have allergies to certain animals. Let's explore how.

Studies have correlated our fluffy family members:

- Lower blood pressure
- Healthy blood lipid levels
- More exercise and time outdoors
- Increased social engagement

While adopting an animal means increased responsibilities, if you've been looking for a reason to bring one home, the health advantages above may be worth considering.

Switching to Reusable Baggies

Plastic baggies are a staple in almost every kitchen. From using them to marinate steaks to storing leftovers in the freezer, they're handy to have around. But they're also harmful to the environment. Each year, millions of plastic baggies end up in landfills, and millions more end up in our oceans.

Believe it or not, there are reusable alternatives that work just as well. Reusable baggies made of silicone come in a variety of sizes and can be used just as easily as plastic baggies can. Some are even dishwasher and microwave safe, making reheating and clean-up a snap. Best of all? No need to repackage your lunch the next day. Just throw a few prepacked reusable baggies into your lunch bag, and you're set for the day.
