
Rise in Cases Inspires Turbulence

Weekly Update – June 29, 2020

The Week on Wall Street

A jump in COVID-19 cases dampened investor enthusiasm last week, sending stock prices lower on worries that rising infections could derail the economic recovery.

The Dow Jones Industrial Average slumped 3.31%, while the Standard & Poor's 500 retreated 2.86%. The Nasdaq Composite Index lost 1.90% for the week. The MSCI EAFE Index, which tracks developed stock markets overseas, declined 1.28%.^{1,2,3}

A Rocky Week for Stocks

Investors began the week overlooking a jump in COVID-19 cases in some early reopening states, sending stocks higher and powering the NASDAQ Composite to close above 10,000 and establish a new record high on successive days. But the market quickly reversed course as investors reacted to data showing a troubling spike in nationwide COVID-19 cases.⁴

In Thursday's trading, stocks opened lower but then rallied late in the day on no apparent news. Stocks resumed their decline on Friday, falling on news that Texas and Florida were rolling back some reopening plans amid rising COVID-19 infections.⁵

COVID-19 Cases

Investor expectations for an economic rebound took a hit last week, following reports of an increase in nationwide COVID-19 cases. The pace of infections had picked up in 33 states, with the seven-day average of new cases higher than the average over the last two weeks.⁶

While traders understood that reopening and increased testing would lead to an uptick in reported cases, the numbers were a bit unsettling. The week's action reminded investors that the market remains tightly tethered to COVID-19 developments.

THIS WEEK: KEY ECONOMIC DATA

Wednesday: ADP (Automatic Data Processing) Employment Report. Purchasing Managers Index (PMI) Manufacturing Index. Institute for Supply Management (ISM) Manufacturing Index. Federal Open Market Committee (FOMC) Minutes.

Thursday: Employment Situation Report. Jobless Claims. Factory Orders.

Sesame Soba Salad

2 to 4 servings

Ingredients:

For the dressing

- ¼ cup rice vinegar
- Tamari
- ½ tsp. toasted sesame oil (more for drizzling)
- 2 tsp. freshly grated ginger
- 1 garlic clove, freshly grated
- 1 tsp. pure maple syrup, honey, or agave

For the soba noodles

- 6 oz. of soba noodles
- 1 sliced avocado
- A squeeze of lemon
- 2 cups of sugar snap peas
- ½ cup edamame (without the shell)
- Thinly sliced radishes
- Fresh mint
- Sesame seeds for garnish

Directions:

1. To make the dressing, combine all the dressing ingredients together in a small bowl and set aside.
2. Cook the soba noodles, according to package directions. Drain, then rinse in cold water.
3. Divide the soba noodles into individual servings and top with lemon juice, avocado, snap peas, edamame, radish, mint, and sesame seeds. Drizzle with more sesame oil if preferred.

Working from Home and Expecting Some Tax Deductions? Not so Fast

With the COVID-19 pandemic changing the way nearly everyone works in 2020, many people have found themselves working from home. While it is true that some home office expenses can be tax deductible, there's a specific distinction that taxpayers should be aware of.

As a result of the Tax Cuts and Jobs Act of 2017, for the tax years 2018-2025, you may not be able to deduct home office expenses if you are an employee. This is different than working from home and being self-employed or an independent contractor. These types of workers may still be able to write off some of their home office expenses.

Practice for Feel First

Every golfer knows that Jack Nicklaus is happy to share his golfing tips (he even published a whole book of them in the early 70s!). One of his many shared is “practice for feel first.”

Many golfers get ready for their game by heading straight to the driving range to hit as many hard drives as possible. Practicing with your smaller clubs will help you establish a proper feel before moving on to the longer ones.

Vitamin C

Vitamin C is a ubiquitous nutrient, and many of us believe we know pretty much everything about it. We get it from citrus fruits. Some of us reach for some over-the-counter supplements if we think we're getting sick. All this is fairly universal. So, how much more is there?

Vitamin C, also known as ascorbic acid, ascorbic is a water-soluble vitamin, and excessive quantities are not stored in the body. Adequate daily intake of vitamin C, preferably through food over supplements, helps maintain our immune health, prevent cellular damage, create collagen, and absorb dietary iron. Some individuals, like smokers, have greater needs for higher daily vitamin C intakes, but for others, this may not be advised. It's always wise to talk to your doctor before adding supplements or changing your dietary regimen.

Mind Your Own Beeswax

Bees are the superheroes of the insect world. They are responsible for pollinating 85% of all human crops and many crops fed to cattle. They also produce superfoods, like honey and pollen, and are single-handedly preventing an environmental collapse.

In addition to all that, bees also produce beeswax, which can be made into products that help decrease single-use plastic. You can buy beeswax food wraps and beeswax bags that reduce the need for cling wrap and plastic bags, respectively. Combine those with glass meal prep containers, and you might never need to use single-use plastic in the kitchen again!
